

ADMIN USER MANUAL

Introduction

This manual is for Admin users of the SaarthIQ platform.

Admins have higher access privileges and can manage system data, users, and overall platform settings.

This guide explains how to log in and navigate through the Admin dashboard in a simple and clear manner.

Admin Login

Admins can access the platform through the official login page.

Enter the registered Admin email ID and password to proceed.

After successful login, the system will redirect to the Admin dashboard.

If the Admin enters a wrong password multiple times, the account may get temporarily locked for security reasons.

Use the “Forgot Password” option if you cannot log in.

Admin Dashboard Overview

Once logged in, Admins will see the dashboard.

The dashboard contains sections such as Advanced filters, User management, Reports.

Each section is used to monitor or control data stored in the system.

USER MANAGEMENT GUIDE

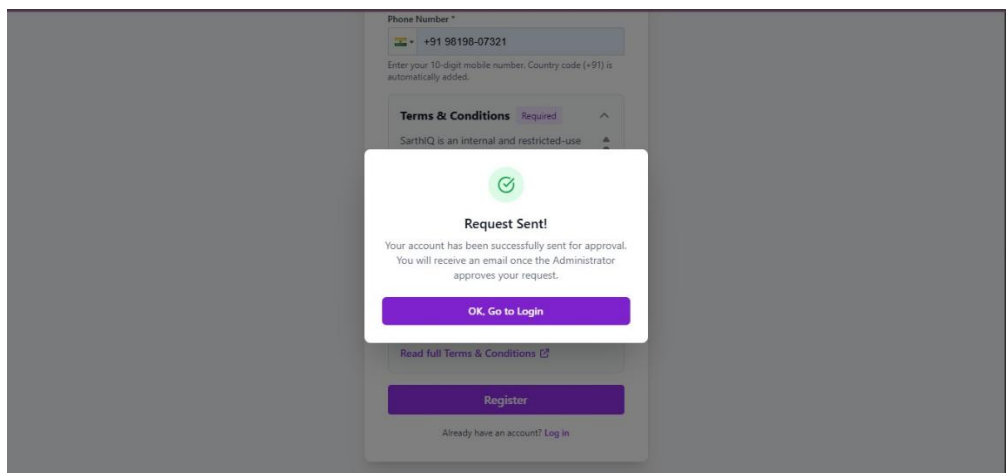

The User Management section allows the Administrator to view, approve, lock, and edit user accounts registered on the SaarthIQ platform. This section appears in the left navigation as Manage Users.

When opened, a panel will appear with multiple tabs and a user list.

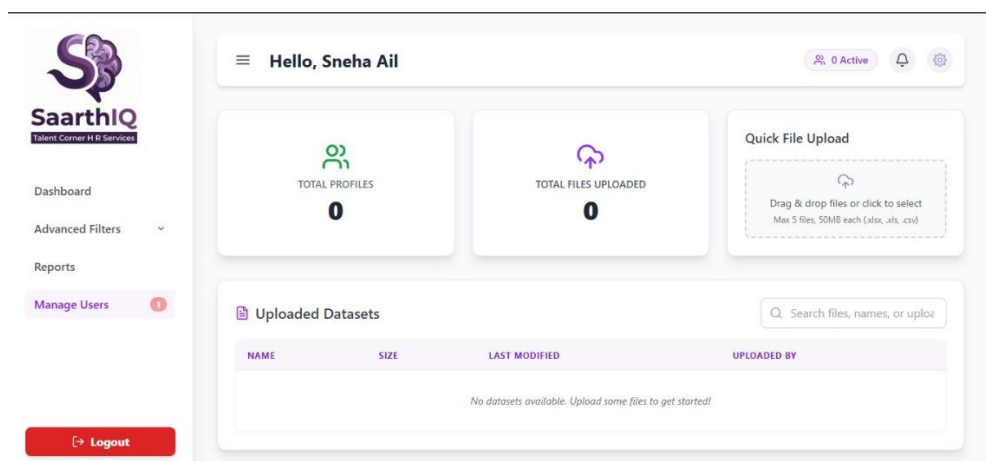

User Registration → Approval Flow Summary

Step 1: User fills registration form and clicks Register.

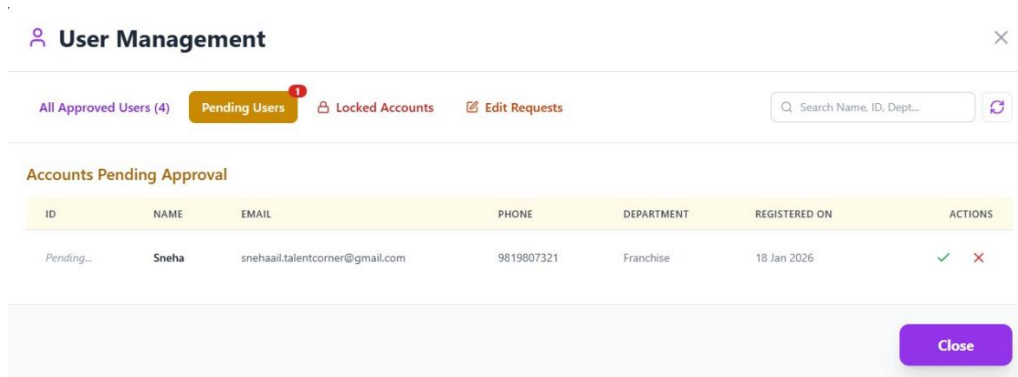

Step 2: User sees “Request Sent” message on screen.

Step 3: The request goes to Admin as a notification under Manage Users tab on dashboard.

Step 4: Admin reviews the request and approves or rejects.

Step 5: If approved, user moves to All Approved Users and can login normally.

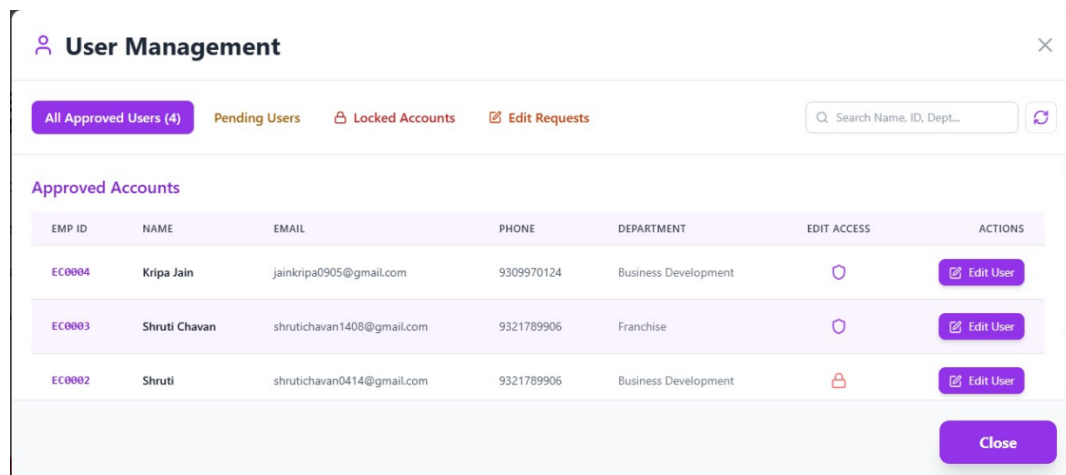

Step 6: If rejected, user cannot login to the system.

User Management – Step-by-Step (Admin Panel)

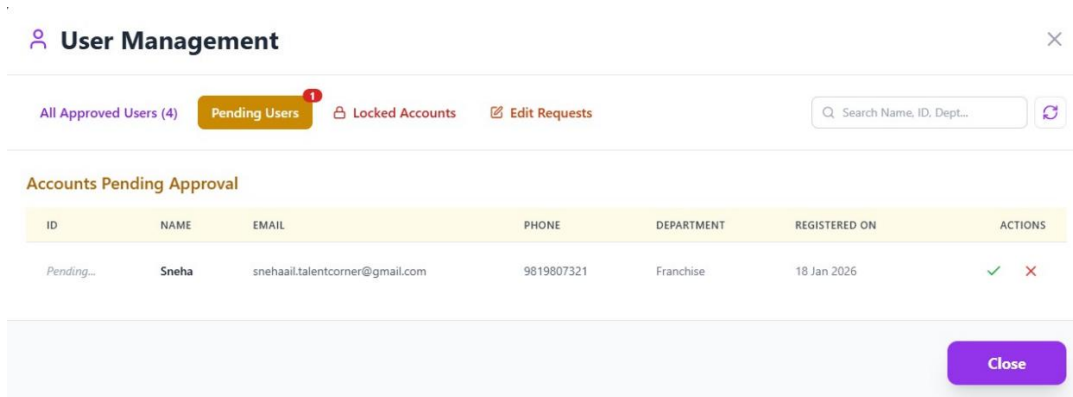

Step 1: Login to the platform using Admin account.

Step 2: On the left side menu, click on Manage Users.

Step 3: A User Management window will open showing multiple tabs:

Step 4: To check new user requests, click on Pending Users tab.

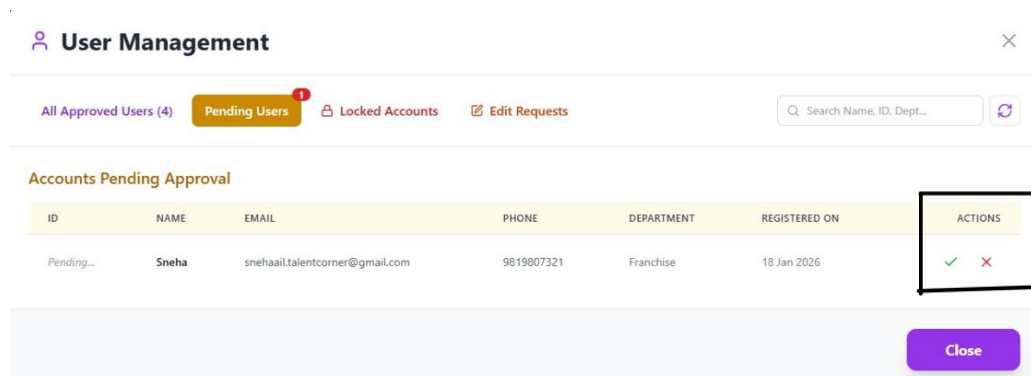

Step 5: Here you will see new registered users waiting for approval with details like:

- Name
- Email
- Phone Number
- Department
- Registered On

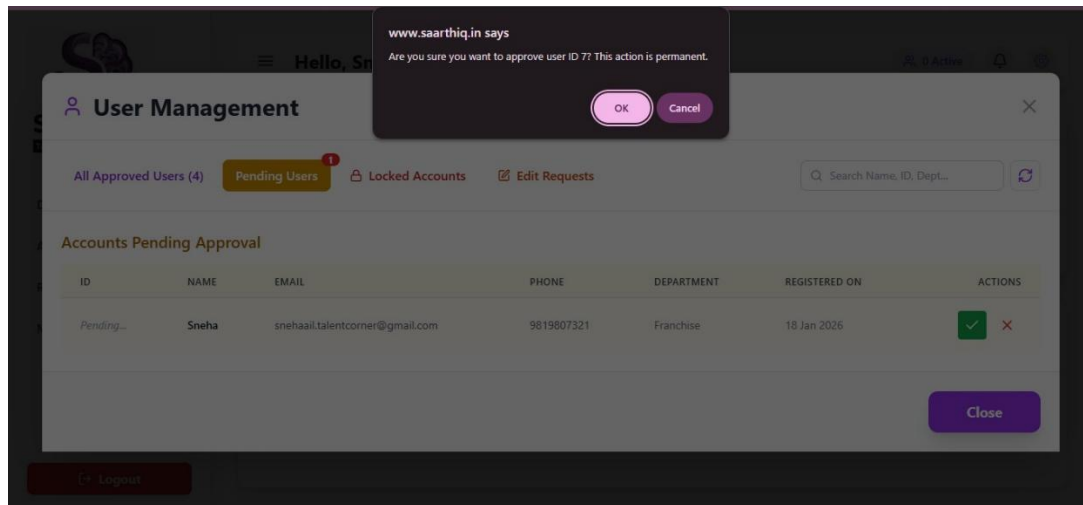

Step 6: On the right side of each pending user, there will be two action buttons:

- ✓ Approve
- ✗ Reject

Step 7: Click ✓ Approve if user is valid.

A confirmation popup will appear asking for approval confirmation.

Step 8: Click OK on the popup to confirm approval.

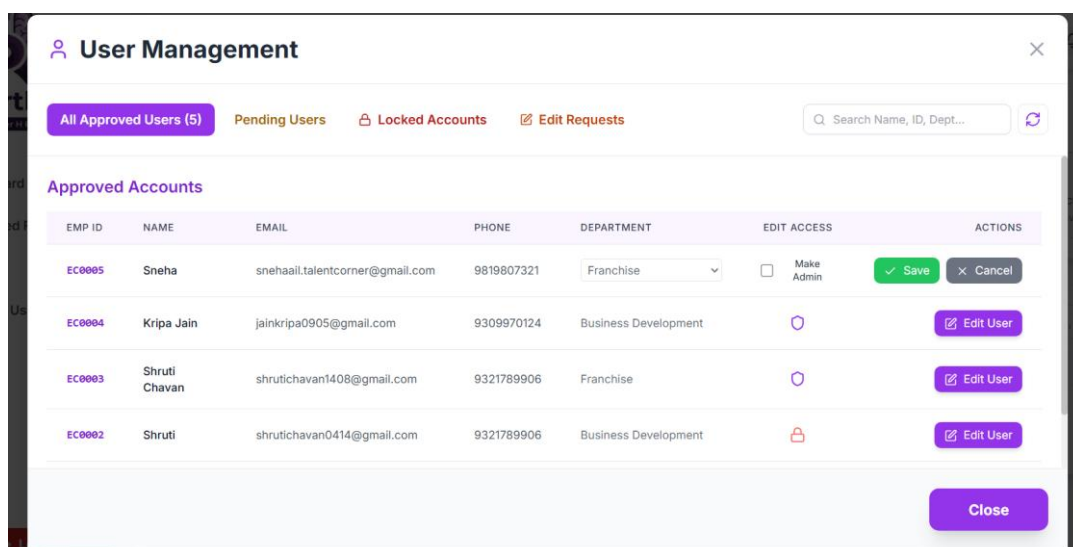

After this, the user will move automatically to the "All Approved Users" tab.

Step 9: If user is not valid, click ✕ Reject to remove the request.

Rejected users will not get login access.

Step 10: For editing any user access or details, click Edit User button on the right side.

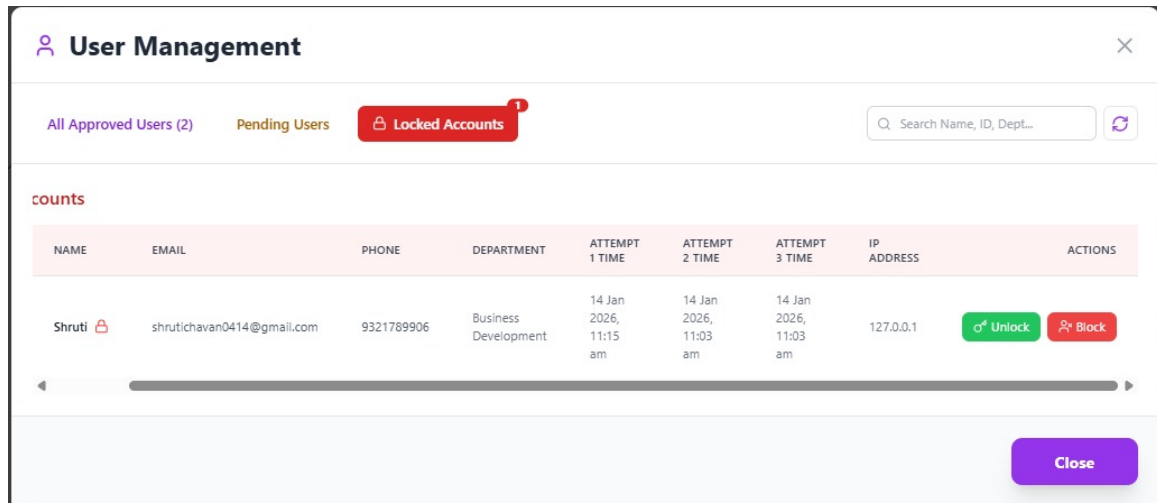

- You can edit the details and to confirm click on "save".

Step 11: If any user got locked due to multiple wrong password attempts, go to Locked Accounts tab.

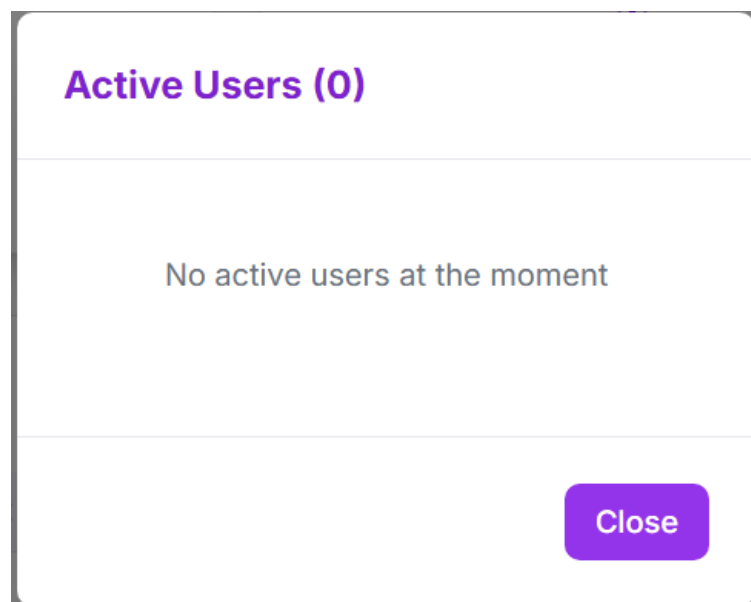

>Locked accounts will appear here with a lock icon.

>Admin can unlock from Edit Access if required.

Step 12: After finishing, click Close button at the bottom or X at the top right to exit User Management panel.

Step 13: To view all active platform users, click on "Active Users" on the dashboard.

System Settings – Email Automation Control

Purpose

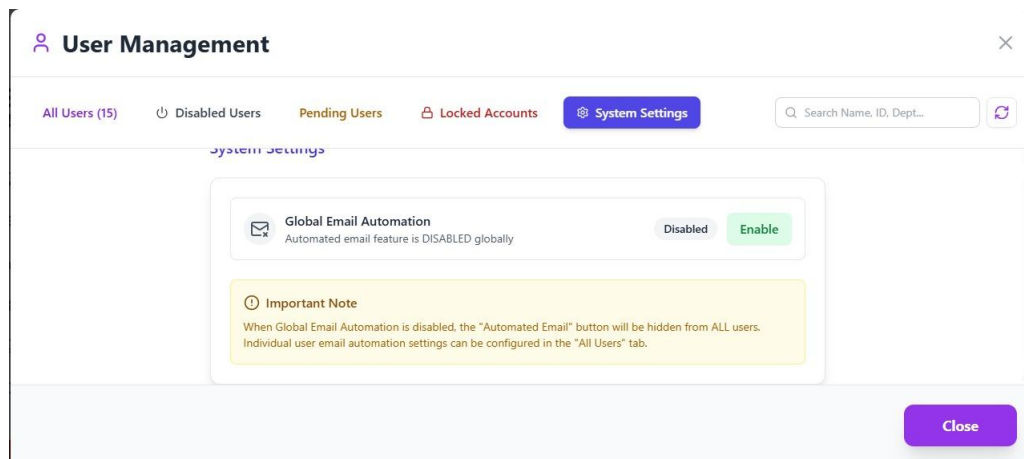

The System Settings feature allows the Admin to globally enable or disable Email Automation for all users in the system.

How It Works

- **When Global Email Automation is Enabled:**
 - Automated email functionality becomes available to users.
 - Users can access and configure email automation from their individual settings (if permitted).
- **When Global Email Automation is Disabled:**
 - The “Automated Email” option is hidden for all users.
 - No automated emails will be sent from the system.
 - Individual user email automation settings are temporarily overridden.

Steps to Enable / Disable Email Automation

1. Navigate to User Management.
2. Click on System Settings.
3. Locate Global Email Automation.
4. Click Enable to activate automated emails
OR
Click Disable to turn off automated emails globally.
5. Changes are applied instantly across the system.

User-Level Email Automation Control (All Users)

- In the All Users section, an Email Auto column is available for each user.
- This option allows the Admin to enable or disable email automation for a specific user.
- User-level email automation can be managed only when Global Email Automation is enabled from System Settings.
- Disabling Email Auto for a user will prevent automated emails from being sent to or by that specific user, without affecting others.

EMP ID	NAME	EMAIL	PHONE	DEPARTMENT	ADMIN ACCESS	EMAIL AUTO	ACTIONS
EC0017	Sneha Ail	snehaail1104@gmail.com	9819007321	Recruitment			Edit Disable
EC0016	Sammed Magdum	samme.magdum@talentcorner.in	9326685889	Business Development			Edit Disable
EC0015	Vaishnavi Bhagat	vaishnavi.bhagat@talentcorner.in	6264229192	Business Development			Edit Disable
-----	Ashutosh	-----	-----	Business			Edit Disable

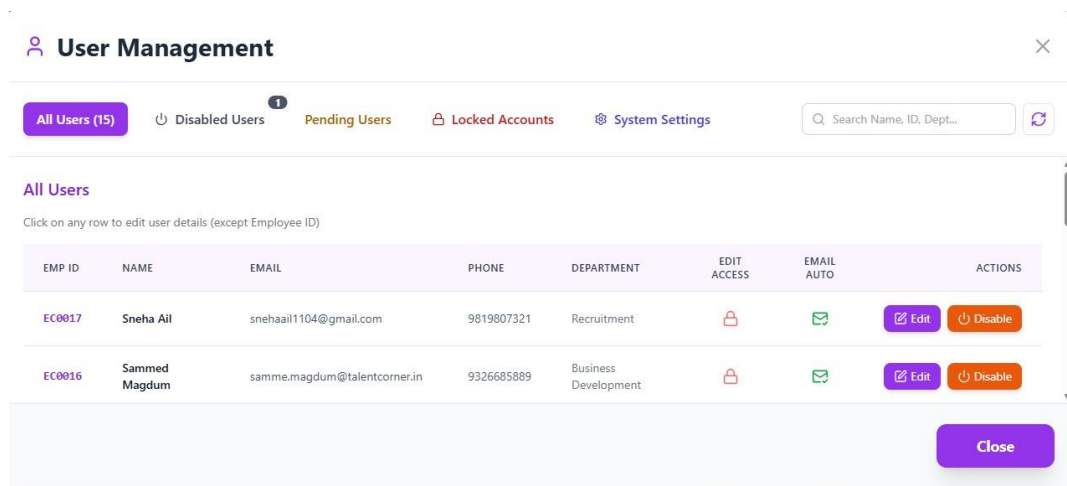

User Disable Management:

Purpose

This feature allows the Admin to temporarily or permanently disable a user account, specify the reason for disabling, and track all disabled users separately for audit and management purposes.

1. Disable User from All Users

- Navigate to User Management → All Users.
- Each user row contains Edit and Disable actions.
- Click on the Disable button for the respective user to restrict their access.

2. Disable User Account - Configuration

Once Disable is clicked, a Disable User Account pop-up appears.

User Details Displayed

- User Name
- Email ID
- Employee ID

Disable Duration Options:

Admin can choose how long the account should remain disabled:

- Permanent – User remains disabled until manually enabled.

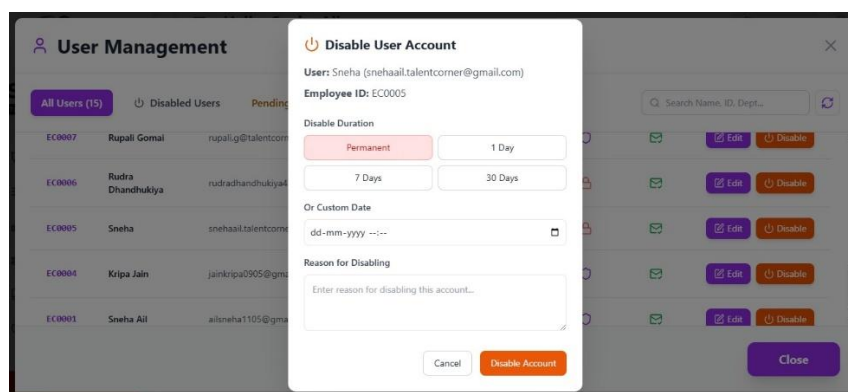

- 1 Day
- 7 Days
- 30 Days
- Custom Date – Select a specific date for automatic re-enable.

3. Reason for Disabling (Mandatory)

- Admin must enter a reason for disabling the account.
- This helps maintain:
 - Transparency
 - Internal tracking
 - Audit history
- Custom reasons can be entered based on the situation (e.g., policy violation, inactivity, role change, etc.).

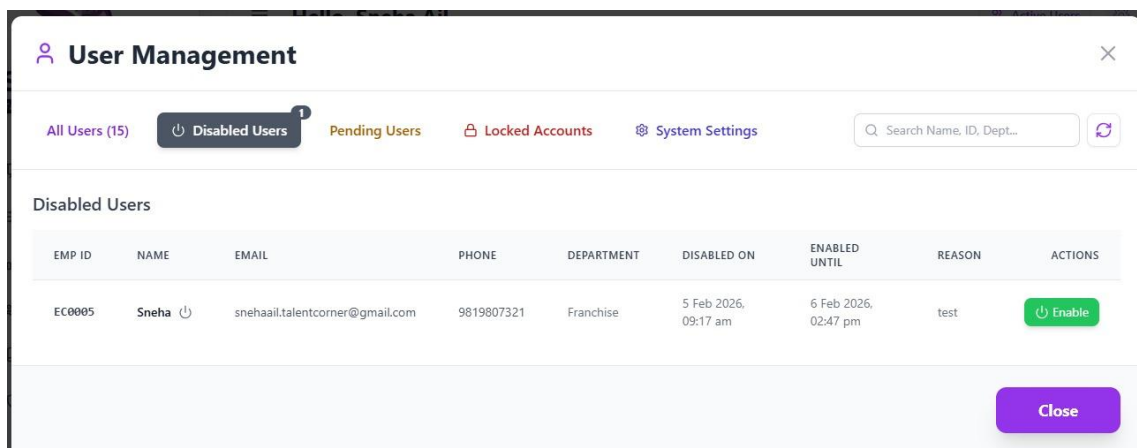

4. Confirm Disable Action

- Click Disable Account to confirm.
- The user will immediately lose system access.
- The action is logged with:
 - Disable date & time
 - Duration
 - Reason provided

5. Disabled Users Tab

- All disabled users are listed under User Management → Disabled Users.
- This section displays:
 - Employee ID
 - Name
 - Email
 - Phone
 - Department
 - Disabled On (date & time)
 - Enabled Until (if applicable)
 - Reason for disabling

6. Re-Enable Disabled User

- Admin can re-enable a user anytime by clicking Enable from the Disabled Users tab.
 - Once enabled:
 - User regains system access immediately.
 - The user is removed from the Disabled Users list and appears back in All Users.
-

ADMIN REPORTS – User Manual

How to Access Reports:

- From the Dashboard, click on “Reports” in the left side menu.
 - The Reports page will open showing analytics and activities for all users.
-

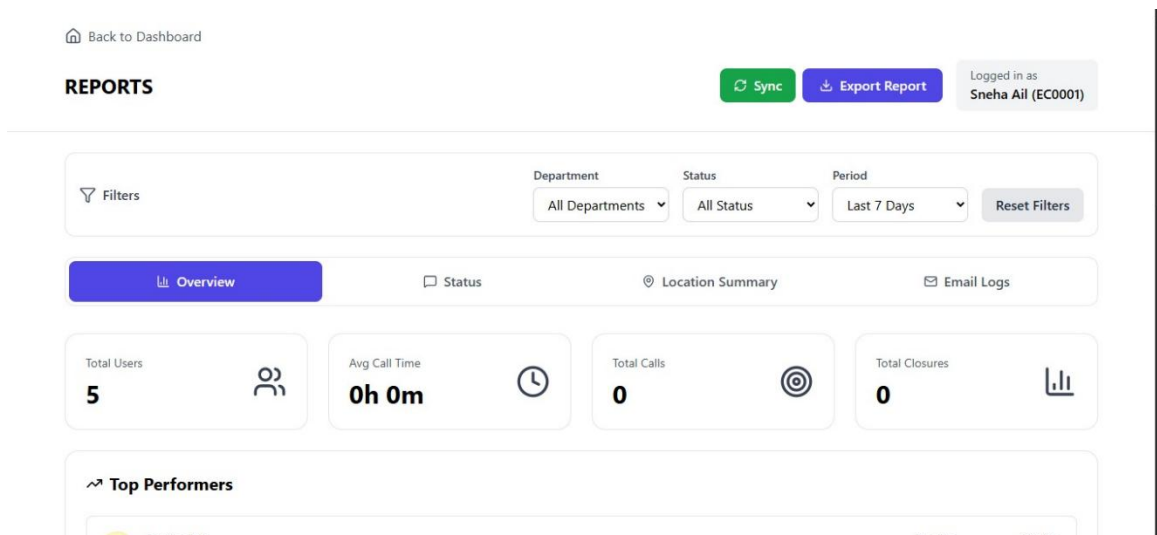

Filters and Controls at the Top

- The admin can use filters to refine displayed data:
 - Department: filter reports based on Admin, Business Development, Franchise, etc.
 - Status: filter based on Active or Inactive status of users.
 - Period: filter reports based on time ranges like Today, Last 7 Days, Last 30 Days, etc.
 - Click Reset Filters to clear all applied filters.
 - Click Sync to refresh report data from the system.
 - Click Export Report to download data in CSV format.
-

Reports Main Tabs

The Reports page has four sections that the admin can switch between:

1. Overview Tab

- Shows overall summary metrics such as:
 - Total Users
 - Average Call Time
 - Total Calls
 - Total Closures
- Displays Top Performers list showing ranking based on calls and performance.

Top Performers					
1	Sneha Ail	EC0001 • Admin	0 calls	0h 0m	0 closed
2	Shruti	EC0002 • Business Development	0 calls	0h 0m	0 closed
3	Shruti Chavan	EC0003 • Franchise	0 calls	0h 0m	0 closed
4	Kripa Jain	EC0004 • Business Development	0 calls	0h 0m	0 closed
5	Sneha	EC0005 • Franchise	0 calls	0h 0m	0 closed

- Shows Performance Details table like this:

Performance Details						
Search by name, ID or email						
Employee ID	Department	Employee Name	Total Call Hours	Profile Views	Login Attempts	Actions
EC0002	Business Development	Shruti shrutichavan0414@gmail.com	0h 1m	1	0	View Activity
EC0001	Admin	Sneha Ail ailsneha1105@gmail.com	0h 0m	2	0	View Activity
EC0003	Franchise	Shruti Chavan shrutichavan1408@gmail.com	0h 0m	0	5	View Activity

Viewing Profile View Details

- In the Performance Details table, click on the Profile Views number to open detailed profile view history.

Profiles Viewed by Sneha Ail

Double-click any profile view count in the main table to see details

Export CSV

Close

- The system will display:
 - Total Views
 - Unique Profiles
 - First View Date
 - Last View Date
- Admin can filter by:
 - Weekly
 - Monthly
 - Quarterly

- Yearly
- Admin can click Export CSV to download the report for records.
- Click Close to exit the popup.

Viewing Activity History for a User

- In the Performance Details table, click View Activity under the Actions column.

Activity Report for Shruti ×

Department: Business Development | Employee ID: EC0002 | Profile Views: 1

Q Search candidate, location, date, or status... All Status ▼ Reset

Candidate Name	Company	Location	Total Calls	Latest Status	Total Hours	Latest Date	Actions
Abdul Rahim Shaikh	No Data	Mumbai	1	in-progress	0h 1m	1/16/2026	View Call Logs

Showing 1 records (Sorted by latest date)

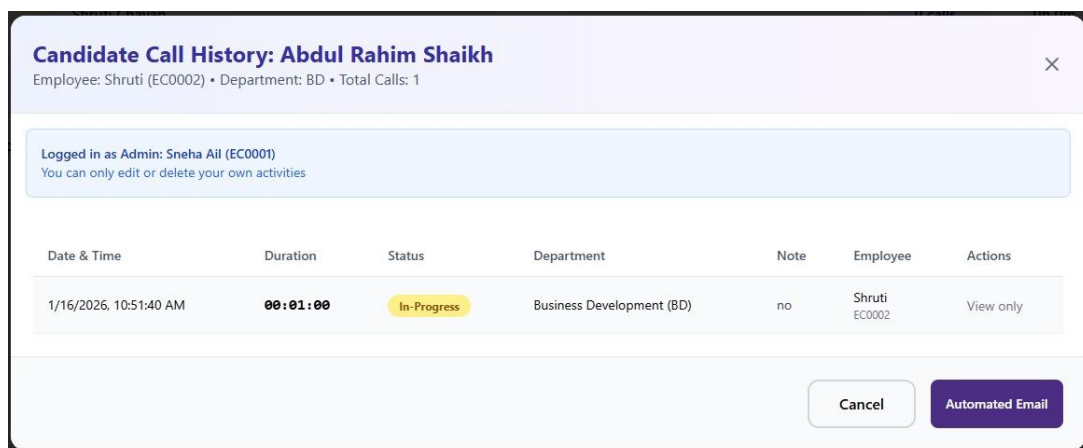

Showing 1 records (Sorted by latest date) Close

- The Activity Report window opens showing:
 - Assigned Candidates
 - Company
 - Location
 - Total Calls
 - Latest Status
 - Total Hours Spent
 - Latest Call Date
- At the top, the admin can see:
 - Department
 - Employee ID
 - Total Profile Views

- The search bar allows filtering by:
 - Candidate name
 - Location
 - Status
 - Date
- The Status Filter on the right allows filtering calls by call status.
- Click Reset to clear filters.

Viewing Candidate Call Logs

- In the Activity Report window, click View Call Logs under the Actions column.

- Candidate Call History window opens showing:
 - Candidate Name
 - Employee handling the call
 - Department
 - Total Call Count
- Below, call logs are listed with details:
 - Date & Time
 - Call Duration
 - Status (In-Progress, Closed, etc.)

- Department
 - Notes
 - Employee Name & ID
 - Admin can only view details. Admin cannot edit other users' logs.
 - Admin can click Automated Email to send automated communication if enabled.
 - Click Cancel to close the window.
-

Key Controls

- Export Report / Export CSV allows admins to download activity records.
 - Sync updates the dashboard with the latest available information.
 - Filters help refine data for better analysis.
 - View Activity helps audit individual user performance.
 - View Call Logs gives transparency into employee calling activity.
-

2. Status Tab

How to Access

- From the Dashboard, click Reports.
 - On the top tabs, click the Status tab to open the status distribution view.
-

Purpose of Status Tab

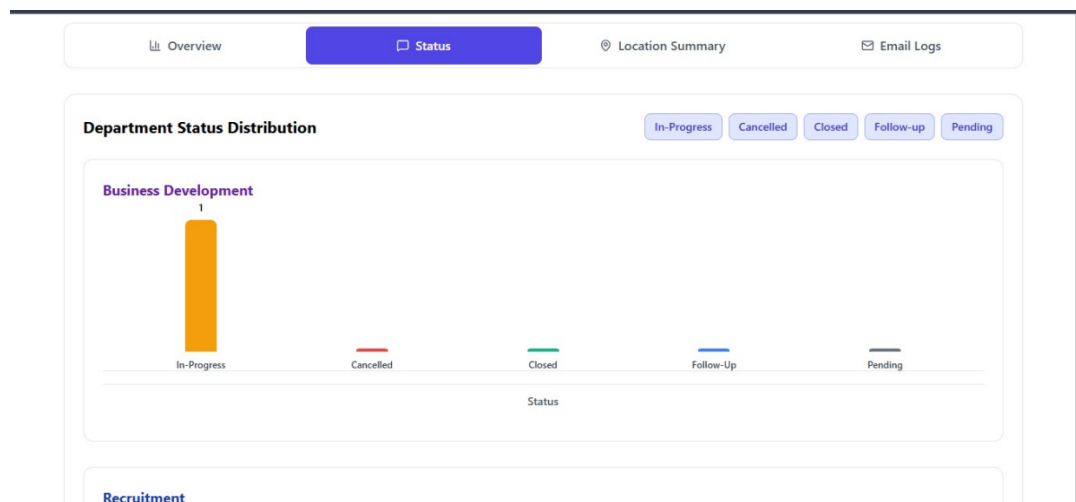

- The Status tab allows the Admin to monitor how many candidates are in each status stage under different departments.
- Helps in tracking candidate movement and workload across teams.

Filters Available

- At the top of the chart, the following status filters are available:
 - In-Progress
 - Cancelled
 - Closed
 - Follow-Up
 - Pending
 - Admin can click on any filter button to show/hide that particular status from the graph.
-

Department Status Distribution

- The system displays a bar chart for each department based on candidate status counts.
- Example departments shown:
 - Business Development
 - Recruitment
 - Franchise
- Each department contains colored bars representing different status categories.

Understanding the Chart

- Each bar represents the count of candidates in a particular status.
- Status types are visually color-coded for quick understanding:
 - In-Progress = Yellow
 - Cancelled = Red
 - Closed = Green
 - Follow-Up = Blue
 - Pending = Grey

Department Breakdown

Below the main chart, each department section shows its own distribution:

- Business Development Section
 - Shows status breakdown for BD team.
- Recruitment Section
 - Shows recruitment team status counts.
- Franchise Section
 - Shows franchise-related activity status.

Key Use Case

The Status tab helps Admin with:

- Tracking candidate pipeline movement
 - Checking bottlenecks (e.g., high Pending or Follow-Up counts)
 - Understanding department performance distribution
 - Assessing workload by status stage
-

3. Location Summary Tab

How to Access

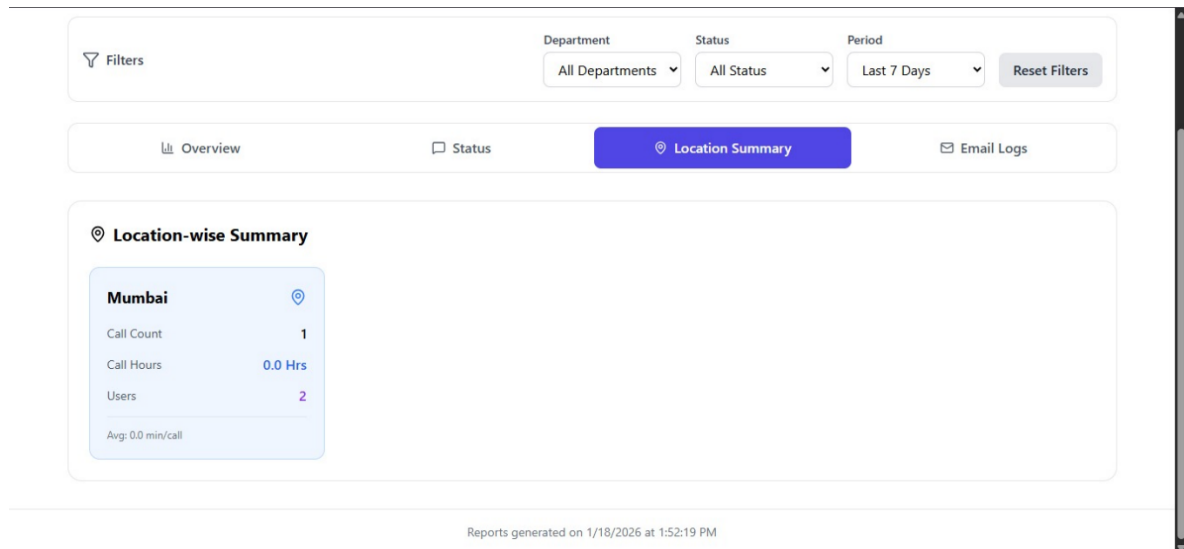

- From the Dashboard, click Reports.
 - On the top tabs, click the Location Summary tab to view location-based calling insights.
-

Purpose of Location Summary

- This section shows call performance based on different geographical locations.
 - Helps Admin understand which locations have higher call engagement and user activity.
-

Available Filters

- Admin can refine the data using the filters at the top:
 - Department – filter data by Admin, BD, Recruitment, Franchise, etc.
 - Status – filter based on call status (In-Progress, Closed, etc.)
 - Period – filter based on selected time frame (Today, Last 7 Days, Last 30 Days, etc.)
- Click Reset Filters to clear all applied filters.

Location-wise Summary Panel

- Each location appears as an individual card with key metrics.
- Each card displays:
 - Call Count – number of calls made for that location
 - Call Hours – total time spent on calls for that location
 - Users – number of users who made calls involving that location
 - Avg Duration – average call duration for that location (if applicable)

Example Interpretation (*based on the screenshot*)

- Location: Mumbai
 - Call Count: 1
 - Call Hours: 0.0 Hrs
 - Users: 2
 - Avg: 0.0 min/call
- This means:
 - 1 call was made to or about Mumbai candidates

- That call had no measurable hours logged
 - 2 different users were involved in calls related to Mumbai
-

Report Timestamp

- At the bottom of the section, a timestamp shows when the report was generated.
 - Useful for tracking data freshness and audit logs.
-

Key Use Case

The Location Summary helps Admin to:

- Identify activity hotspots based on location
 - Monitor user workload by region
 - Analyze hiring interest from different areas
 - Compare performance across time filters
-

4. Email Logs Tab

How to Access

- From the Dashboard, click Reports.
 - Select the Email Logs tab from the top menu to open the email tracking section.
-

Purpose of Email Logs

- This section allows the Admin to view all system-generated emails sent to candidates.
 - Helpful for tracking communication history, follow-ups, and delivery status.
-

Available Filters

- At the top of the Reports section, general filters can be applied:
 - Department
 - Status
 - Period
- Click Reset Filters to clear all applied report filters.
- Inside the Email Logs section, additional controls are available:
 - Search Bar – search by candidate name, email, or subject.
 - Time Filter – dropdown allows filtering logs by date period such as Last 30 days, Last 7 days, etc.

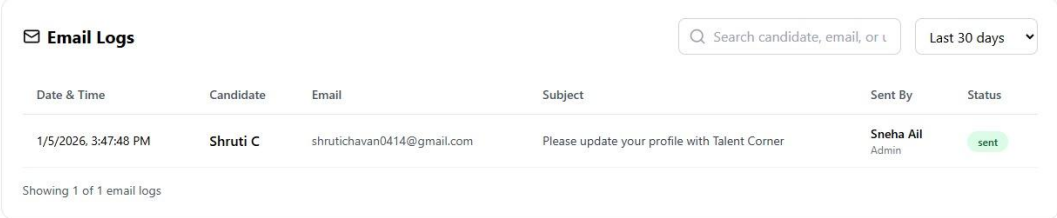

The screenshot displays the 'REPORTS' section of a system. At the top, there are tabs for 'Reports' and 'Email Logs', with 'Email Logs' currently selected. A user profile 'Sneha Ail (EC0001)' is visible in the top right. Below the tabs, there is a 'Filters' section with three dropdown menus: 'Department' (set to 'All Departments'), 'Status' (set to 'All Status'), and 'Period' (set to 'Last 7 Days'). A 'Reset Filters' button is located to the right of these dropdowns. Below the filters, there are four tabs: 'Overview', 'Status', 'Location Summary', and 'Email Logs', with 'Email Logs' being the active tab. The 'Email Logs' section features a search bar with the placeholder text 'Search candidate, email, or subject' and a time filter dropdown set to 'Last 30 days'. Below these, a table displays email logs. The table has columns for 'Date & Time', 'Candidate', 'Email', 'Subject', 'Sent By', and 'Status'. A single log entry is shown for the date '1/5/2026, 3:47:48 PM', sent to 'Shruti C' at 'shrutichavan0414@gmail.com' with the subject 'Please update your profile with Talent Corner'. The email was sent by 'Sneha Ail Admin' and its status is 'sent'. At the bottom of the table, it says 'Showing 1 of 1 email logs'. A footer note at the bottom of the page states 'Reports generated on 1/18/2026 at 1:52:34 PM'.

Date & Time	Candidate	Email	Subject	Sent By	Status
1/5/2026, 3:47:48 PM	Shruti C	shrutichavan0414@gmail.com	Please update your profile with Talent Corner	Sneha Ail Admin	sent

Email Logs Table Details

- The log table displays one record per email sent.
- Columns included:
 - Date & Time – when the email was sent
 - Candidate – name of candidate who received the email
 - Email – email address of the candidate
 - Subject – email subject line sent by system

- Sent By – user (Admin/BD/Franchise) who triggered the email
- Status – delivery status (e.g., *sent*)

Email Logs					
Date & Time	Candidate	Email	Subject	Sent By	Status
1/5/2026, 3:47:48 PM	Shruti C	shrutichavan0414@gmail.com	Please update your profile with Talent Corner	Sneha Ail Admin	sent

Showing 1 of 1 email logs

Reports generated on 1/18/2026 at 1:52:34 PM

Example Interpretation *(based on screenshot provided)*

- Date & Time: 1/5/2026, 3:47:48 PM
- Candidate: Shruti C
- Email: shrutichavan0414@gmail.com
- Subject: “Please update your profile with Talent Corner”
- Sent By: Sneha Ail (Admin)
- Status: *sent*
- This means the system successfully sent a profile update email to the candidate on the mentioned date and time.

Key Use Case

The Email Logs helps Admin in:

- Verifying successful delivery of automated emails
- Finding when and who triggered an email
- Tracking follow-ups with candidates
- Maintaining compliance and communication history
